

WVU Parking Permit Display Rules and Regulations 7/2010

Hangtag Style Permits (Areas 75, 86, 90, 94)

Hangtag style permits are to be displayed on the rear view mirror of the vehicle, facing forward. Per local state regulations, all hangtag permits must be removed prior to operation of the vehicle. Failure to display the permit in this manner without the approval of the Parking Management office may result in a citation.

Repositionable Style Permits (all other WVU parking locations)

(Pictured are acceptable permit positions)

Repositionable style permits are to be displayed affixed to the lower left interior corner of the vehicle windshield, near the inspection sticker, facing forward. Per West Virginia state regulations, repositionable style permits are acceptable in the Non-critical area (area not cleaned by the windshield wipers). Failure to display the permit in this manner without the approval of the Parking Management office may result in a citation.

Placement of Repositionable Style Permits

Step 1 – Peel the plastic liner at the perforated joint in the material

Step 2 – Place the permit on the windshield. Do not rub the permit onto the windshield, allow the permit to cling to the windshield. This will allow the permit to be more easily removed in the future and placed in another vehicle.
